CONSTRUCTION

CORTLAND WAGON

In the manufacture of this wonderful cart only the very best quality of everything is used. Wheels, Kenney patent, A I grade: axles steel, double collar, size I inch; shafts, best second growth bickory, thoroughly seasoned, XXXX quality. The scat and body frame is constructed of Tsteel side pieces: bottom made of veneered wood, three thicknesses, thoroughly rivited to side pieces. The side pieces are connected in front under shafts with a joint, and are supported by means of two spiral springs, as shown in cut. These springs are made from best, curcible steel, and twalve for colled in each, oil tempered, laminated wood seat softom; forged iron sest rall; finished in the white; nicely staiped, and will leather trimined. This cart guaranteed in all pages.

CAREFULLY NOTE THESE POINTS .--1. This easy riding cart has no seat bars to climb over in getting in or out of the seat. This makes it desirable for all

classes of people
2. It is the only cart that can be adjusted to suit the road and the weight of the rider. Five seconds will produce this

The bottom is solid, in preference to slats so commonly used, which protects driver from dust and mud. Where other carts have from 2 to 3 foot springs, the Spiral has 24 foot springs, giving more elasticity than any other

It is the lightest draught cart in the market.

It balances perfectly.
It is free from horse motion. 8. A perfect beauty in appearance.

TO HORSEMEN

A TEST.—Place 2 or 4 scantlings S or 10 feet apart on a road, and then drive over them as tast as your horse can trot or run. We will guarantee that the rider shall not be moved from the seat by such a severe test. Try any other cart and watch the result.

We guarantee the springs for 5 years. Should they break, we replace them free of charge. Ask any other manufac-

tarer to give you such a warrantee and see what he will say.

If you are told that other carts have no horse motion, it is only when the horse is standing still, for with such carts you wely get a very unpleasant jerking motion, that is entirely avoided with our Spiral Spring cart. We have this cart with double-seat only. Always buy a good article.

Helly, Savage Copes, Sally Flexcher, and Heary Wessells' here consisting of swamp land, and is divided into the two lands and in the first of the charging line, and finally the lands and is divided into the two lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands are lands of the charging line, and finally the lands of the lands of

their dead and wounded from the fleid as they sullenly retired.

There was not a tree or a house to hide a

survey 64 7-10 acres, and bounded as follows: On the N. by the lands of Savage Copes, Absalom Lewis and Sally Fletcher; on the E. by the land of Henry Wessells' heirs; on the S. by the land of Henry Wessells' heirs; on the S. by the land of said heirs and Lot No. 1; and on the W. by the land of Savage Copes.

These two tracts of land will be sold in lots as described above, and the terms of sale will be as follows:

THE TERMS OF SALE.

United States, the famous "Cracker Castle," in St. Louis, is soon to be torn down. The building has been a monument to the folly of Charles Pierce, who built it at a cost of \$75,000 out of the fortune he made in furnishing the government with havitack in war times. There is not a comfortable room in the castle. It has long been an object of ridicule. Its next owner after Mr. Pierce was F. C. Sharp, who bought it for \$50,000 and sold it for \$14,000. It is related that a stranger once asked Mr. Sharp, "What fool built that house?" "Oh," replied Mr. Sharp, "The Terms of SALE.

The Prince Imperial's Pony noney must be paid in cash on the day of sale, with liberty to the purchaser to pay as much more as Trussian war has just come to a sudden end, Prussian war has just come to a sander chi, like its unfortunate master. After Sedan the pony was bought by a German baron and was kept on his estate in Silesia for his children to ride. Becently it fell down on a slippery road and broke its leg and had to be shot.—Chicago Herald.

A Rabbi at Prayer. The United States senate was open prayer one morning by Rev. Dr. H. Pereira Mendez, a Jowish rabbi of New York. Dr. Mendez wore his high hat during his prayer, much to the surprise of the senators, who did not seem to be aware statit is not the custom of rabbis to uncover their head wiren offering prayer.-Harper's Bazar.

In Wyoming Territory for at least three months in each year, for all between the ages of 7 and 16, education is compulsory, and to all residents of the territory between 57 and tional security until the payment at from primary school to university in-of the whole purchase money.

A Suggestion for School SuperIntendents

A very ingenious indicator of the amount of carbonic acid in the air has been invented by Professor Wolpert, of Numberg. The principle of the apparatus is that when the red solution of sodium phonalphthalide is red solution of sedium phonal pathalide is acted upon by carbonic acid it loses its color. At regular intervals of time, say every 100 seconds, a drop of the red liquid falls from a syphon on a thread behind which is a scale. As the drop trickles down the thread it loses its color slowly or quickly, depending on the amount of carbonic acid present in the nit. If the air is perfectly were the drop stays amount of carbonic neid present in the rit. If the air is perfectly pure, the drop stays red during its whole course. The scale shows 0.7 parts of carbonic acid in 1,000 for "pure air," and 4 to 7 parts in 1,000 for "extremely bad." It would be a capital idea to have some such apparatus in our public schools, where so often the atmosphere is simply villainous. Children at in overcrowded rooms, with feet like ice, beads like fire, and brains like glue, breathing and rebreathing disease germs and unteld gassons nastiness, and this, too, in the present civilization, when ventilation and the results of the lack of it are so well understood. When the lack of it are so well understood. WI the children sicken it is, of course, a "di-pensation of Providence." How ing allo men are in unleading responsibility on the Almighty!-Philadelphia Times.

Latest Novelties Our Latest

Announcement.

and Plashes

In order that our Spring Stock for 1888, in all its departments may be the most varied, attractive and tasty of any on this Peninsula, and that our customers may be snited in style, quality and prices, at home (hence avoiding the necessary expense of sending to the cities.) we have bestowed much time and labor upon its selection. It is not only necessary in this age of cultivoted tastes, to buy as low as the lowest, but it is also essential to so buy for each department that our customers may find upon our counters the latest and most desirable goods in the market. One of the most popular Dress Fabrics this season is the all wool Henrietta Cloth. The most desirable shades are Goblin Blue, Grey, Mahogany, Serpents Green, Terra Cotta, Browns and Bright Blues; all these we have and many other desirable goods, which we haven't room to mention in this paper. In Silks we offer a special line of Black Rhadame, Taille Français and Gro. Grain at \$1.25, which we do not believe are surpassed in value anywhere at the price; other Silks at 50, 75 to \$1.00. We cordially invite the people of Accomac and Northampton counties to call and see us

The High Bred Trotting Stallion MAMBRINO PILOT, JR.,

Will make the spring season of 1888 on the Eastern Shore of Virginia. TERMS-\$25 to insure a mare to be with foal; \$15 for service the swason; \$10 single service; groom's fee 50 conts. DESCRIPTION. This horse is a handsome coated dark chest-nut log hands high, is of high form and finish, up headed, and strong made, the action accom-panied with speed.

PEDIGREE. 1st generation—Sire Mambrino Pilot, record 2:24 %, he has gotten seven trotters among them 2 Hamis 2:17 %, Mambrino Gift 2:20. Mambrino Pilot has ten sons that have gotten 20 trotters, and six of his daughters have dropped & trotters dam an American Star marc; from an American Star marc came Doster 2:17 %, Jay Gould 2:20, and many others.

2nd ceceration—We find Mambrino Chiet, Juliet by Pilot, Ir., American Star and Sally Slough by the race horse Henry that ran American Eclipse.

REMARKS.

The horse trois—his sire was a troiter and gottroiters; his dam is of the best producing blood in America, and their descendents are breeding on and producing troiters. Mambrino Pilot Jr., stood near Princess Anne. Md., for many years, and left; a fine class of speedy road horses from ordinary mares, that have sold for large prices. It is seldom that a horse of such rare breeding is kept on the fastern shore of Virginia, and he edges would de well to take advantage of the chance here effect. For further particulars apply to Wif F. FLIMING.
